

License Plate Recognition (LPR) Analytics

Accurately Capture Vehicle License Plates

FASTER SEARCH

Avigilon LPR analytics automatically reads license plate information from vehicles, linking it to live and recorded video. This enables security operators to search and quickly find specific captured license plate video for verification and investigation.

WATCH LISTS

Create and import several license plate watch lists so that ACC™ software can provide you with security alerts, helping you take decisive action when needed.

REGIONAL SUPPORT

Our LPR analytics recognize and search license plates with high accuracy. It is easy to configure and use, with broad regional and country support including North America, Europe, Japan, Australia and the United Kingdom.

DATA PRIVACY

The data privacy protection features of ACC software enable you to restrict access and set automatic retention time and deletion rules for LPR data.
